ADDENDUM 3: ORGANICS PROCESSING SERVICES RFP

The purpose of this document is to provide clarification regarding RethinkWaste's Request for Proposals for Organics Processing Services issued on February 28, 2020. Specifically, the wet signature requirement for notarization for Form F's Anti-Collusion Affidavit is waived, such that submission of scanned signature and forms within overall PDF Proposal electronic submission is accepted. The content in this Addendum takes precedence over that in the RFP file, especially in its adjustment of proposal submission method and deadline.
