REDUCING IS EASY!

According to a 2018 study by the U.S. EPA*, the average person generates 4.9 pounds of waste every day. On top of properly sorting materials into the recycle, compost, and garbage carts, we can all make small changes to reduce the amount of waste we produce. Here are some helpful tips!

1. **Refuse single-use cutlery.** Plastic utensils are not recyclable and are deemed contamination at the RethinkWaste facility. Bring your own reusable utensils and be sure to say “No utensils please!” when ordering takeout.

2. **Store your reusable bags in a convenient location.** A common issue with reusable bags is that we forget them when we’re out! Store your reusable bags in an easy-to-grab spot, such as near the front door, in a bag, purse, or in the car.

3. **Repurpose containers.** Containers you receive from takeout or from the store are incredibly versatile and can be used in creative ways. Use them to store food, pens, art supplies, or grow plants in them.

4. **Ditch plastic water bottles.** Plastic water bottles can be completely avoided if you have your own reusable water bottle.

5. **Rethink your purchases.** Ask yourself while shopping:
   - Do I already have this?
   - Do I need this?
   - Will I use it more than once?
   - Could I borrow or rent this?
   - Can I buy this secondhand?

These questions will help in reducing unnecessary purchases.

KITCHEN COMPOST PAIL MAINTENANCE

Looking to keep your kitchen compost pail clean? Here are five easy ways to care for your kitchen pail for a great composting experience!

1. Line your kitchen pail with a BPI-certified bag, newspaper, or paper bag to keep it clean.
2. No liners? No problem! Rinse or wipe pail clean as needed to keep it smelling fresh.
3. Prefer to use the dishwasher? Go right ahead! This kitchen pail is dishwasher safe, but just make sure to avoid the heat dry setting.
4. Empty the contents of your kitchen pail every few days to prevent odors. Every household may be a little different depending on how quickly you fill it up.
5. Place food scraps in the freezer to prevent any leaks and smells.
